Denver-based Platte River Networks Named One of the Top 250 Solution Providers in the North America

December 12, 2011 - Denver, CO – Platte River Networks was recently honored in CRN magazine's Next-Gen 250 list as one of North America's top emerging solution providers. This list features North American technology integrators and solution providers who are successfully engaging innovative and emerging technologies. CRN Magazine, which has been covering evolutions in the technology industry for the past 30 years, recently created its inaugural honoree list from thousands of eligible candidates.

All of CRN's recipients are selected from progressive and agile businesses, solution providers, and resellers across the United States and Canada. The areas of expertise from which the honorees are drawn include offering solutions and services in cloud computing, mobility, business intelligence, unified communication and virtualization. Platte River Network's CEO Treve Suazo states:

"By staying ahead of the most pioneering technology, we are able to provide our clients with affordable, easily implemented solutions that will most favorably impact their business. To this end we consistently strive for innovation and improvement. We are thrilled CRN recognized us as one of the top 250 emerging solution providers in North America."

For the past nine years, Platte River Networks, a technology consulting firm based in Denver, Colorado, has provided complete IT services for small- to mid-sized businesses throughout Denver and the region. Their expertise and work ethic has resulted in hundreds of diverse clients across many industries.

Platte River Networks made a name for themselves when they introduced *Intuition*, a proactive monitoring and maintenance suite bundled within the Cloud and capable of handling their clients' entire IT infrastructure. *Intuition* provides 24x7 remote and onsite management of network environments; including cloud based business class: antivirus, email security, web security, offsite backup and disaster recovery.
